WD06 Wall installation

The Dyson Airblade Wash+Dry hand dryer is designed so that the motor unit is located behind the stud wall within a metal enclosure which is supplied with the Dyson Airblade Wash+Dry hand dryer (Fig. 1). The vertical wall studs must be constructed so as to allow the metal enclosure to be fitted between them (Fig. 2). One of the horizontal wall studs must be fitted a) so it holds the main weight of the metal duct and the unit, and b) so it is in the correct position for the tap stem.

For complete instructions, please refer to the printed installation guide supplied with the machine.

TECHNICAL SPECIFICATION

Electrical
Input voltage: Low Voltage = 100-110V, High Voltage = 200-240V
Frequency: Low Voltage = 50-60Hz, subject to voltage
(120V at 60Hz; 100-110V at 50Hz), High Voltage = 50-60Hz
Motor specification: 1000W digital brushless motor
Motor Speed: 81,000 rpm
Motor Switching rate: 5,400 per second
Motor type: Dyson digital motor – V4 brushless DC Motor
Amp: Recommended dedicated 15 amp circuit,
Low Voltage = 9.09 amps at 110V, High Voltage = 6.36 amps at 220V
Operating temperature range: 0°-40°C, 32°-104°F
Heater type: None
Standby power consumption: Less than 0.5 W

Sink specification
The Dyson Airblade Wash+Dry hand dryer is compatible with most sink types. Ensure plugs are not installed in the sinks and avoid inserts with embedded plugs (e.g. ones that swivel or elevate).
Using a specially designed test method, Dyson engineers evaluated the user experience of a wide range of sink types when used with the Dyson Airblade Wash+Dry hand dryer. For further details on our recommended sinks, please see the pre-installation guide on our website: dyson.com/docs
We recommend avoiding sinks with the following geometric characteristics:
Flat bases immediately surrounding the drain hole, nominally within a 2 5/16” (60mm) radius.
Sloping back and front wall transitions in relation to the base of the sink.
See our pre-installation guide for further details: dyson.com/docs
Sink dimensions:
All sink measurements are internal unless stated otherwise.
Minimum width of sink: 15” (380mm), Front to back – Minimum: 13” (330mm)
Minimum depth of sink: 5” (127mm)
Maximum depth of sink for WD05 only: 8” (200mm)
(External measurement of vessel sink)
Sink materials: Sinks with highly polished surfaces should be avoided, e.g. reflective chrome. Porcelain or brushed metal is ideal. When multiple taps are installed side-by-side, tap centers should be a minimum of 22 7/8” (580mm) apart.

Standard warranty
5 year parts, 5 year limited labor warranty.
