

# dyson pure cool me

Focused purified airflow, at your fingertips

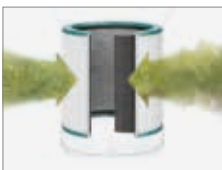

Precisely control your airflow. By adjusting the dome's position, you can angle the flow higher, or lower.

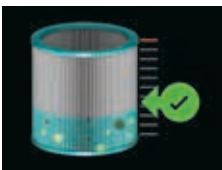

## Key features

**Dyson Core Flow™ technology**  
Projects a focused stream of air.

**Sealed HEPA filtration**  
Filter captures 99.95% of ultrafine particles.<sup>1</sup>

**Easy filter maintenance**  
Built-in reminders show you when your filter needs changing. It's quick and easy to do, to ensure your machine is always working at its best.<sup>2</sup>

**Smooth 70° oscillation**  
Set your machine to rotate from side to side, to deliver airflow through a 70° range.

**LCD screen**  
Gives you a detailed view of your airflow speed, modes and filter life.

**Remote control**  
With ten precise airflow settings. Curved and magnetised to store neatly on the machine.
