In the box

Your machine will come with one or more of these cleaner heads – not all will be included.

Vacuum cleaner with click-in battery

Main body showing the handle and bin attached.

Motorbar™ cleaner head
De-tangling vanes automatically clear wrapped hair from the brush bar as you clean.

The charger is a one piece unit with the plug, connector end and cable.

A rectangular dock with an angled end.

Wall dock
The Dyson cordless vacuum drops into the wall-mounted charging dock, ready for your next clean.

A rectangular battery with an slanted connector that slides into the handle of the main body of the machine.

Charger
Charges your vacuum with or without a dock.

Additional click-in battery
Not all models are supplied with an additional click-in battery. You can buy additional click-in batteries at www.dyson.com.

Wand
The narrow connector end at the top, this connects to the bin and the wider end at the bottom that connects to the cleaner head or tool.

Some tools may not be included.

You can buy additional tools at www.dyson.com.

Combination tool
Two tools in one – wide nozzle and brush, for quick switching between cleaning and dusting tasks around your home or car.

A brush bar located inside the cleaner head and a suction control slider located on the front.

Crevise tool
Engineered for precise cleaning around tricky edges and into hard-to-reach narrow spaces.

A small cleaner head with an angled body housing the motor and an electrical connector to attach to the wand or directly to the machine.

Extension hose
Adds up to 24in of flexible reach to any tool attachment, to clean up high or down low in your home or car.

With an elbow joint, fitted between the bin and the tool.

Hair screw tool
Anti-tangle conical brush bar spirals hair off and into the bin. Motor-driven cleaning for smaller spaces.

Light pipe crevice tool
Crevise tool with LED lights lets you reach into dark, narrow spaces and see where you’re cleaning.

Pliable bristles and felt bumper strip on a narrow, tapered tool.

A long tool with an angled end.

Soft dusting brush
Enclosed in a skirt of soft nylon bristles for gentle, vacuum-assisted dusting of delicate objects and surfaces.

A long tool with an angled end.

Stubborn dirt brush
Stiff nylon bristles dislodge ground-in dirt from coarse carpets, high traffic areas and car interiors.

A wide, triangular shaped nozzle.

Up-top adaptor
Bends and locks at different angles. Fits any compatible tool for effective cleaning in hard-to-reach high areas of your home.

A plastic clip that attaches to the wand

Fabric and mattress tool
Removes dust, dirt and allergens from mattresses and upholstery.

Wand clip
Clips to your vacuum’s wand to hold tools.
Getting started

**Power modes**
Your machine has three power modes for different tasks. Change power modes quickly using a single button.

**Eco mode**
Maximum run time for longer cleans all around your home.

**Boost mode**
Designed for intensive spot cleaning of ground-in dirt.

The screen showing the machine set to Eco mode with a full battery in green to show that this will give the longest battery life of the three modes.

The screen showing the machine set to Auto mode with a blue battery showing that this will give a medium length of battery life.

The screen showing the machine set to Boost mode with a red battery to show that this will give the shortest battery life of the three modes.

Diagram showing the connection of the wand onto the main body, with the wand release button aligned with the top of the main body.

Arrow showing the end of the wand connecting to the cleaner head.
The LCD screen shows performance, including the cleaning mode selected, remaining run time, filter maintenance and blockage information.

Settings menu
Control the settings on your machine using the Selection button. To enter the settings menu, press and hold the button until the menu screen appears. Tap to scroll through the options available.

Change language
To change the language on your screen, press the button and hold until the language list appears. Release the button.
Tap the button to scroll through the language list to your preferred language. Press and hold the button until the countdown ends.
A green tick will appear on the screen to show your language selection is complete.

To cancel your selection, release the button during the countdown.

Change alert settings
You can turn the alert motor pulse off. Your motor will no longer pulse but run time alert information will continue to be displayed on the LCD screen when your machine needs your attention.

Turning off alerts will not turn off the blockage alert pulsing. This is to ensure you clear any blockages, preventing damage to your machine.

Tap to scroll through the settings menu. Select the ‘Alerts’ option.
Scroll to select on or off. Hold the button until the countdown ends and a tick appears on the screen. To cancel your selection, release the button during the countdown.
Run time countdown
When the battery needs charging, your machine will pulse three times and a low run time icon will appear on the screen.

When your battery is empty, a red warning icon will appear on the screen.

Battery health
To get the best performance and life from your battery, use Eco or Auto/Med mode.

Exit settings menu
Screen with Exit menu wording and return icon.
Caring for your floors

Check that the underside of the cleaner head or tool is clean and free from any objects that may cause damage.

Before vacuuming your flooring, rugs, and carpets, check the manufacturer’s recommended cleaning instructions.

The brush bar on your machine can damage certain carpet types and floors. Some carpets will fuzz if a rotating brush bar is used when vacuuming. If this happens, we recommend vacuuming without the motorised floor tool and consulting with your flooring manufacturer.

Charging your machine

It’s important to fully charge your new machine before using it for the first time, and after every clean. This is because the battery and monitoring system’s algorithm ‘learns’ over time, and fully charging your machine helps it to more accurately calculate and display remaining run time.

Connect to the charger either directly or in the dock.

The blue LEDs on either side of the battery will flash during charging.

When the battery is fully charged, both LEDs will light for 5 seconds.

Your battery is fully charged when the display shows 100%.

Your machine won’t operate or charge if the ambient temperature is below 41°F (5°C). This is designed to protect both the motor and battery.

Changing your click-in battery

If you have additional click-in batteries, we recommend that you alternate the batteries to maintain even performance.

Removing your battery
Push the Battery release button on the handle and slide the battery off your machine.

Charge the battery.

Refitting your battery
Align your battery with the handle and slide it in. Push firmly until it clicks into place.
Emptying your bin

Empty as soon as the dirt reaches the MAX level – don’t overfill. Using your machine when the dirt is above the MAX line may affect the performance and require more frequent filter washing.

Remove your wand
Press the red wand release button, on the top of the wand, and pull the wand away from the bin.

Release the dirt
Hold the machine over the bin, pointing downwards.

Firmly push the red bin release button. The bin will slide down, cleaning the shroud as it goes, and the bin base will open.

The bin base won’t open if the red bin release button isn’t pushed down all the way.

Minimize dust contact
Cover your bin tightly in a dust proof bag while you empty. Remove your bin carefully, seal the bag tightly and dispose.

Close the bin
Push the bin base upwards until your bin and bin base click into place.

Cleaning your bin

Remove your bin
If it is necessary to clean your bin, empty it as shown in the ‘Emptying your bin’ section.

Press the red button located on the bin runner to release the bin and slide your bin off the runner.

Only use a damp, lint-free cloth to clean your bin.

Make sure that your bin and seals are completely dry before replacing.

Refit your bin
Insert the spine on to the bin runner.

Close your bin by pushing the bin base upwards until the bin and bin base click into place.

Your bin isn’t dishwasher safe and the use of detergents, polishes or air fresheners to clean your bin isn’t recommended, as it may damage your machine.
Clearing blockages

Disconnect your machine from the charger before looking for blockages. Be careful not to touch the trigger and be aware of sharp objects.

Leave your machine to cool down before looking for blockages.

Don’t use your machine when looking for blockages as this could cause injury.

If your machine detects a blockage, the motor will pulse and you won’t be able to use your machine until the blockage has been cleared.

If you try to use your machine when the motor is pulsing, it will automatically cut out.

Check the main body
Remove the bin and check for blockages in the main body of your machine.

Make sure any blockages are completely cleared and all parts are fitted before using your machine.

Check the wand and cleaner head
Check the wand for blockages.

Check your cleaner head for blockages, following the instructions to remove the brush bar, where necessary.

Re-assemble your machine
Refit all parts securely before using your machine.

Clearing blockages isn’t covered by your guarantee.

With the bin removed, check for blockages, paying particular attention to the air inlet, located at on the right-hand side of the machine just below the point where the bin joins the main body of the machine.

With the wand removed from the machine, check for blockages at both ends of the wand.

Turn the cleaner head over to check for obstructions on the brush bar and air inlet.
Clearing obstructions from your Motorbar™ cleaner head

Your Motorbar™ cleaner head doesn’t have a washable brush bar. To maintain optimum performance, check your brush bar regularly and clear any obstructions.

Make sure your machine is disconnected from the charger and make sure your machine power is turned off.

Remove your brush bar
Don’t put any part of your machine in a dishwasher or use detergents, polishes or air fresheners.

Press the cleaner head release button on the end of the wand. Place the cleaner head upside down.

Use a coin to unlock the end cap.

Twist the end cap and remove it from your brush bar. Don’t wash the end cap.

Slide your brush bar out of the cleaner head.

Look for obstructions
Clear any debris from your brush bar.

Check inside the cleaner head and remove any debris or blockages.

Your Motorbar™ cleaner head and brush bar aren’t washable. Wipe over with a damp lint-free cloth.

Don’t put any part of your machine in a dishwasher or use detergents, polishes or air fresheners.

Replace your brush bar
Push the end cap back on to your brush bar and slide it back into the cleaner head.

Turn the end cap into the locked position.

The lock located on the side of the cleaner head, is rotated 90° to release the end cap and the brush bar can be removed.

The removal of the brush bars showing the lock in a horizontal position and the unlock symbol at 90° anti-clockwise and lock symbol at 90° clockwise.
Clearing blockages from your Hair screw tool

Your Hair screw tool doesn't have a washable brush bar. To maintain optimum performance, check your brush bar regularly and clear any obstructions. Make sure your machine is disconnected from the charger and take care not to touch the trigger.

Remove the cover and brush bar
Remove the Hair screw tool from the wand or machine.

Push the base plate open. Press the red lever down to release the cleaner head cover.

Pull the cleaner head cover off the main body of the tool.

Look for obstructions
Pull your brush bar firmly to remove it from the main body.

Check and remove any obstructions from all three parts of your Hair screw tool.

Your Hair screw tool isn't washable. Wipe over with a damp lint-free cloth.

Don't put any part of your machine in a dishwasher or use detergents, polishes or air fresheners.

Re-assemble Hair screw tool
Put your brush bar back into position and press firmly until it clicks back into position.

Check the red locking lever is in the unlocked position. Align the cleaner head cover with the guide on the main body. Push it down until it clicks into position.

Push the red locking lever up until it clicks into position and push the base plate back into place.
Washing your filter

Wash your filter at least once a month to maintain optimum suction power.

For more information and support videos for your machine go online: www.dyson.com/support

Twist off your filter
Twist your filter counter-clockwise and pull it away from your machine.

Tap your filter
Before washing your filter, tap it gently over a bin to remove any loose dust and debris.

Wash your filter
Wash with warm, running tap water – gently rubbing your filter with your fingers to remove the dirt.

Fill and shake
Place your hand over one end of your filter.

Fill the filter with warm tap water.

Place your hand over the open end of the filter and shake it firmly to remove trapped dirt and debris.

Repeat these steps until the water runs clear.

Shake and dry
Empty the filter and shake firmly to remove excess water.

Keep shaking until there’s no water coming from the filter.

Place your filter end up, as shown.

Place the filter on its end and leave to dry for at least 24 hours in a well ventilated, warm place.

Don’t dry your filter in a tumble dryer, microwave or near a naked flame.

Important: your filter must be completely dry before you put it back into the machine. Your machine could be damaged if used with a damp filter.

The filter is located at the rear of your machine.

Holding the filter by the hard, plastic end, tap the other end over the bin.

Filter held in upright position, with the wider end in the palm of a hand. Water running from a tap into the narrower end.

Filter with hand over the open end with arrows showing a shaking motion.

A hand holding the filter with the narrow end pointing downwards with droplets of water being shaken from the filter and again, with the end pointing downwards shaking water out.

The filter is left to dry with the pleated filter end facing upwards.
Cleaning your tools

Don't put any part of your machine in a dishwasher or use detergents, polishes or air fresheners.

Wipe with a damp, lint-free cloth, without touching the connector end.

Make sure your tools are completely dry before using.
Looking after your machine

To always get the best performance from your machine, it's important to clean it regularly and check for blockages.

Look after your machine
If your machine is dusty, wipe with a damp lint-free cloth.
Check for blockages in the cleaner head, tools and main body of your machine.
Wash your filter regularly and leave to dry completely.
Don't use detergents or polishes to clean your machine.

Look after your battery
To get the best performance and life from your battery, use Eco or Auto/Med mode.
Your machine won't operate or charge if the ambient temperature is below 41°F (5°C). This is designed to protect both the motor and battery.

Your serial numbers
You can find your serial numbers on your machine, battery and charger.
Use your serial number to register.
